

TECH TIPS

Dixie Part Numbers: S-2154

Applications: 2007 Ford Edge
2007 Lincoln MKX

Conditions: The operator of the vehicle may complain of one or more of the following conditions:

- Intermittent no crank/no start
- Heavy or extended cranking
- The malfunction indicator lamp is on
- The engine jerking or bucking

The technician may find one or more diagnostic trouble codes stored in the system.

Cause: A potential cause for the above conditions is a poor connection or unseated wire at the battery junction box.

Correction: Follow the manufacturer's recommended diagnostic and repair procedures, which seem to detail completely overhauling the battery junction box.
